I'm a hardworking and self-motivated DevOps engineer with more than 5 years of experience with Linux-based systems.

WORK EXPERIENCE

DevOps Engineer
Cafe Bazaar Cloud

06/2019 - Present　　　　　　　　　　　　　　　*Tehran, Iran*

Cafe Bazaar Cloud (Sotoon) is a privately held company in Hezardastan Group, providing Cloud and AI services to other holding products like Bazaar, Divar, and Balad with over 60 million users.

Achievements/Tasks
- Implemented Thanos.io as long-term storage for Prometheus.
- Reduced false alarms from more than once a day to less than once a month.
- Implemented high available Grafana with PostgreSQL database.
- Maintenance of an email server with more than 2 million outgoing emails per day.
- Maintenance Atlassian stack like Jira and Confluence.
- Automated deployment pipelines using Gitlab CI.

DevOps Engineer
Bistoon

10/2018 - 05/2019　　　　　　　　　　　　　　　*Tehran, Iran*

Bistoon is a value-added service (VAS) company founded in January 2017 which develops some applications in such fields as education and entertainment.

Achievements/Tasks
- Wrote Dockerfile and containerize legacy application deployments.
- Made CI/CD pipelines for all projects via Gitlab CI.
- Improved backup strategy.
- Implemented monitoring and alerting stack.

Software Engineer Intern
Rahnema College

08/2018 - 09/2018　　　　　　　　　　　　　　　*Tehran, Iran*

Rahnema College is a place to educate and empower talented and eager people to enter the professional job market.

Achievements
- Teamwork concept
- Feedback concept
- Scrum

Linux System Administrator
Self-employed

2015 - Present

I configured and maintenance many VPN / Proxy servers to bypass Iran's internet censorship.

Some services:
- OpenVPN UDP and TCP through proxy
- Wireguard
- STunnel
- Squid

SKILLS
